## Introduction

'Great web solutions' sees website development as only a part of a total web based solution. We are basically a web business advisor. With our wide and flexible range of services and support, your business can harness the true power of the World Wide Web easily, rapidly and flexibly using branded services profitably.

For example, we can help you use the solution for:

- Professional website Designing & Development
- Web Application Development
- Corporate Identities & branding in terms of web presence & print.
- E-commerce & Marketing services
- Web based promotion & related services

## Why A great web solutions

'Great web Solutions' has always been at the forefront in innovative and path breaking IT solutions.

We are the channel partners of Spectra Net (the best and most efficient company offering web server space in India), Net 4 India (the biggest domain registering company in India), and here at 'Great web solutions', pride in claiming ourselves as result-oriented marketers & caterers of quality products and services in the fields of Web Technologies, Graphics, Software, Domains, Hosting, corporate Branding to help build our esteemed customers their brand not just in relation to their online presence but also arm them with tools that are well operational in generating quality sales.

What we believe in is or in other ways to say is that our philosophy speaks of doing business in a very simple manner: we succeed only when our clients succeed. We do everything possible, surrounding our arena, to ensure they do.

We are talking here of a media that has properties to attract every audience having a requirement of technology products and services. They are affluent, could be humble as well, educated or just business driven and empowered by their organizations to invest in IT and Internet solutions or self financed. What we mean to refer here is that we welcome clients without discriminating them on any ground.

'Great web solutions' is also in the field of server systems, software, hardware solutions, web development, SMS solutions, Mobile applications, & Media branding.

## Business Solutions & Services

'Great web solutions' offers an array of software solutions, Intranet and Extranet based web solutions enabling customers to increase productivity and profitability through fresh technologies. Through its comprehensive service offerings, we meet the requirements of businesses.

Using our services, subscribers can implement the following rapidly:

- Web design
- Software- ERP, CRM...etc
- Web Based Applications
- Hosting and electronic commerce — including core hosting, electronic commerce solutions, extended enterprise, co-location, integrated application, and custom and complex hosting.

Ensuring seamless service for the customer, we offer businesses a comprehensive range of customized programs, end-user help desk support, and end-user implementation services.

---

#### **Flexible Integration & Service Availability**

We are committed to bringing the best solutions to web based challenges in the Enterprise. In our understanding, the Enterprise is any organization that is reliant upon computer systems and networks for it to function. We are able to deliver solutions to both Corporate and other small institutions.

Being unable to get what you want & when you need to: it is not just frustrating but it can also waste valuable time and resources. Our service availability targets aim to give you a direct and fast communication between you and us without any gaps.

Our Self-evaluation and feedback system helps us to constantly monitor the activities and assignments, which are currently active and potential problems, and usage of service and its general performance.

---

#### **Scalable Service & Support**

At Great Web Solutions, we endeavor to achieve excellence by meeting the needs of the customer, analyzing market trends and perpetually upgrading our skills. Along with creative thinking, our qualified personnel also have the latest technical knowledge.

---

## **PROJECT SCOPE**

The website will have a liquid layout, and will be packaged with meaningful graphics wherever required. Web2.0 standards will be followed while developing the website. We will design 2-3 templates for the website, and send it for client approval. The approved template will be used for website development.

The website will have following works:
